204-881-5673

Winnipeg, Manitoba, R3T 4H9, Canada

Highly motivated professional, organized, and goal-oriented with over 10 years of experience as a FullStack Developer. Ability to solve problems, experience in roles to maintain existing computer programs with attention to detail. Adaptable, quick learner, and willing to learn.

## Work Experience

### Senior Systems Analyst

Jan 2023 - Jul 2024

*Asesoftware | Bogota*

- Enhanced Colpatria Scotiabank projects by adding functionalities for auditing security events like user access and permission changes, ensuring compliance through detailed reports.
- Developed a new chatbot with Node.js for Santander Bank in Chile, reducing estimated development time by 10% through clean coding practices.
- Reduced LATAM chatbots' technical debt by 20% by optimizing database usage, improving architecture, and refactoring code for better maintainability.

### Backend Developer

Aug 2021 - Dec 2022

*Tuya | Medellin*

Decreased the technical debt of Digital Sales APIs by 80% by resolving incidents reported by Kiuwan and Sonar, refactoring APIs into microservices, and updating documentation with PlantUML.

- Improved Product Query API response time by 30% through targeted code refactoring, enhancing performance and user experience.

### Software Architect

Oct 2020 - Aug 2021

*IDE Sistemas | Medellin*

- Improved the user experience of some web pages of the SAR system, making them more user-friendly and easier to use, assuming the role of Web Developer
- Boosted client base by 6% through implementing the Electronic Billing module in accounting software for public entities.
- Implemented Azure DevOps for user story registration, reducing requirement loss by 40% and improving client response times by 30%.

### Software Engineering Analyst

Apr 2015 - Oct 2020

*MVM Ingenieria de Software | Medellin*

- Incremented the number of web pages by 90% to allow the gathering of master data. All of this under the initial role as a Web Developer, using React and Node.js.
- Enhanced real-time rendering speed of XM energy dispatch views by 20% through adopting the best programming practices and refactoring techniques.
- Led the DEO-TR project as a technical leader, delivering 94% of user stories within established timeframes.

## Volunteer Experience

### Web Developer

Oct 2024 - Present

*FEDLATAM*

Maintenance and development of the website.
